Zoom! In Chair Whitening

Zoom! Whitening is an in-surgery, instant whitening procedure. Unlike other whitening systems which can give varied results, we have found Zoom to be far superior to other products, providing our patients with great results time and time again.

We offer two types of whitening

- Zoom! Whitening (In chair only)
- Zoom! Whitening (Package)

Zoom! Whitening (In chair only) is a 90 minute appointment. During the appointment, before and after photos will be taken of your teeth and barriers will be placed on your gums & lips. A gel is then applied to your teeth and activated with a specially designed light. Your teeth will be exposed to the light in three 15 minute sessions. A fourth session may be needed for darker stained teeth.

Zoom! Whitening (package) is a 120 minute appointment and our most popular option. It is the same process as the in chair whitening but you are also provided with a take home kit at the end of your appointment. This includes individually made trays to fit your upper and lower teeth and some whitening gel to use at home should you ever like to top-up your whitening at a later stage.

*Before booking any whitening treatment, you will need to see our dentist to ensure you are suitable for Zoom! Whitening.

Please let us know if you have any questions or would like to schedule a consultation. Our reception team will be pleased to assist you in any inquiries.

We look forward to hearing from you soon!
